

FOR CLAIMS PROCESSING

Meet Olive, Your Newest Employee

Using Artificial Intelligence, Olive becomes a valuable employee by automating repetitive, high volume tasks, and provides true interoperability by working with the systems and tools you already have in place.

Around 9% of claims submitted are denied, costing health systems as much as 3.3% of patient revenue.

Olive helps process claims in a more efficient manner so that you and your staff can focus on the most important thing—your patients.

Automate claims processing with Olive to reduce the risk of:

- Covered services being denied
- Cases having to be reviewed again
- Claims having to be resubmitted

Olive...

- ▶ Receives a code claim from a staff member
- ▶ Uses machine learning* to determine the probability of denial
- ▶ Submits claims with low probability of denial
- ▶ Returns claims with high probability of denial to staff members for review

* Machine learning is how Olive learns by example.

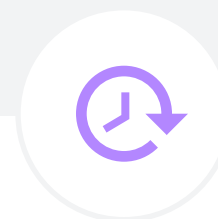

NO INTEGRATIONS

Olive uses your existing applications and is system agnostic

FULL AUTOMATION

Eligibility, prior authorizations, claims processing, order management, and more

AROUND THE CLOCK

Olive works 24/7 and never takes breaks, sick days or vacations
