

FOR ORDER MANAGEMENT

# Meet Olive, Your Newest Employee

Using Artificial Intelligence, Olive becomes a valuable employee by automating repetitive, high volume tasks, and provides true interoperability by working with the systems and tools you already have in place.

86% of errors made in the healthcare industry are made due to clerical or administrative errors.

Olive helps streamline the order management process so that you and your staff can focus on the most important thing—your patients.

### Olive uses...

- Machine Learning to become an 'expert' at identifying orders with a high likelihood of denial
- Optical Character Recognition (OCR) to read and transcribe incoming orders into the EMR

### Olive...

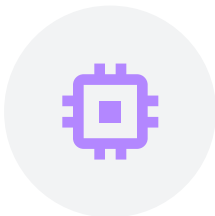

Monitors physician orders for known problematic codes

Alerts staff members when problematic codes are present

Alerts staff members when codes with a high likelihood of denial are present

Reads and transcribes incoming physician orders into the EMR

By sitting at the front of your order management process, Olive drastically reduces the number of errors in physician orders, thus reducing total number of denied claims.

#### NO INTEGRATIONS

Olive uses your existing applications and is system agnostic

#### FULL AUTOMATION

Eligibility, prior authorizations, claims processing, order management, and more

#### AROUND THE CLOCK

Olive works 24/7 and never takes breaks, sick days or vacations
